

## Awareness Activities

On April 8, 2009 Swedish ambassador Mrs. Eva Zetterberg, a group of Urbaser-Kiasa engineers, executives from the Chile-Sweden Cooperation Fund, and leaders from the public and private sectors gathered at the ambassador's residence. The objective of this meeting was to communicate the results and conclusions of the "Sustainable Treatment for Sludge" study. To better manage this type of waste, several efficient alternatives and sustainable solutions were proposed amid a positive dialogue.

At the event, the audience could find out about new proven experiences tried in Chile and Sweden. This gave way to an exchange of ideas with solid proposals to face the challenges in the reutilization of this type of waste and the reduction of the environmental impacts.

Among the presenters: Cristián Aburto, Chile-Sweden Cooperation Fund Coordinator; Arturo Arias, Urbaser-Kiasa Group Engineering Sub-Manager; Martine Oddou, Project Manager; Raúl Espinace, PUCV Geotechnical

Group Director; and Matías Errázuriz, Consorcio Wetland UTC General Manager.

Assisted to the event: Claudia Pastore, Christian Calderón and Alejandra Hernández representing the metro regional Health Agency (Seremi); Ignacio Guevara, President of the Chilean-Swedish Chamber of Commerce; Fernando León, Urbaser-Kiasa Group General Manager; David Cibebe and Jorge Díaz, representing Fundación Chile's Marine Resources Dept.; Ingeborg Suckel, SISS metro area Environmental Coordinator; Anna Pfeifer, Chile-Sweden Cooperation Fund executive; representatives from several companies such as CoActiva, AASA, Aguas y Riles e Hidráulica, and academics from Universidad de Atacama and PUCV.
