***URBASER-KIASA Group,
working for you.***

CELTA - IQUIQUE

This service calls for the removal, transport, and final disposal of ash and scrap generated by the combustion of coal at the Tarapacá thermo-electric plant.

The agreement consists on the transport of these waste materials from temporary storage places inside the plant such as “ash area” and “scrap storage pool”.

The waste material is retrieved from both of these mentioned sites and taken to its final disposal landfill located 15 km (9 mi) away from the plant. Once there, both the ash and scrap are laid in consecutive layers and compacted to an appropriate Proctor level. Last, the waste product is covered with overlaying material and maintained at an appropriate moist level to avoid the pollution of surrounding places.

These services require a 24 hour, 365 days a year constant rotation.

CMRIS

INDUSTRIAL SOLID WASTE MANAGEMENT CENTER (ISWMC) – CODELCO El Teniente División

The Industrial Solid Waste Management Center (ISWMC) is a project designed, built, and operated by KDM S.A. for Codelco Chile, El Teniente Division. It is located near Caletones within the El Teniente mining complex, around the city of Rancagua.

The Center receives waste materials generated by several sources in more than 140 different points around the El Teniente mining complex. It accepts materials from all other El Teniente sources as well.

All waste materials are checked into the ISWMC. Once in the Center, the materials are sorted and taken to warehouses specially built for their safe storage. All truck loads arriving to the ISWMC must park in area designated for sorting, storage, and treatment of ISW. The ISW then is classified based on its specific nature and characteristics: hazardous ISW, non-hazardous ISW, and residential-like ISW.

KDM S.A. BECOMES A MEMBER OF THE PRO-O'HIGGINS ASSOCIATION

KDM. S.A. became a member of the Pro-O'higgins Association as a way of contributing to the development of the region and to improve their human capital. We are honored to have the chance to bring our vast experience as a leader in waste management and environmental services.

KDM and 26 other partner companies in this Association have a strong compromise with the community and are firm supporters of Corporate Social Responsibility (CSR). First, our actions are focused at maintaining appropriate work conditions for our personnel. In addition, we are constantly developing policies and programs benefiting our employees and their families. Last but not least, we place a special emphasis on job security, training opportunities, and professional growth.

Some of the member companies are: Codelco, Sodexho, Agrosuper, Lipigas, Ralco, and Compañía General de Electricidad.

CORPORATE SOCIAL RESPONSIBILITY

A meeting with the mayor of the Teno community Sandra Valenzuela Pérez, took place on April 08, 2009. On this occasion, our company informed her of the process of environmental certification for two of the district's schools. One of them was School F-68, "Las Arboledas". This is part of the cooperation program subscribed between KDM S.A. and CONAF.

The meeting was very pleasant and the municipal authority was pleased with the results of our job with the children of both schools.

Among the participants were: El Guananco Sanitary Landfill Chief Engineer, Waldo Santelices, Juan Andrés Rivera, and María Paz Fuenzalida.

María Paz Fuenzalida and Waldo Santelices

LET'S MEET OUR NEW COWORKERS

Administrative Personnel

Claudio Enrique Sabat Pietracapina

Sub-Manager Northern Area Office (Antofagasta)
Industrial Services Management Office

Profession: Industrial Engineer, Catholic University of Chile. MBA Madrid School of Superior Studies, Spain.
